Experience

Software Developer, Avanade   July 2019 — February 2023

UX Engineer – Web Application Project (Health Care Company)

- Developed the UI using JavaScript, HTML, CSS to help users get information on healthcare programs and sign-up for themselves and their family.
- Revised existing features and worked closely with a Dynamics 365 developer to integrate the new UI changes in Power Pages.
- Collaborated regularly with the team to ensure responsive HTML/CSS and JS development

Full Stack Developer – Software Project (Multinational Telecommunication Company)

- Acted as a SME for front-end development and was responsible for maintaining the web application using HTML, CSS, and JavaScript.
- Played a crucial role in making the application compatible with multiple browsers. Received positive feedback from the client and the lead architect for leading the approach on the project.
- Developed and tested RESTful API's using Java and Postman, wrote SQL queries and deployed changes to the development environment using Jenkins.

Front-End Developer – Software Project (Multinational Telecommunication Company)

- Collaborated with the front-end team to use Angular and PrimeNG to implement responsive UI components such as forms, tables, pagination, and more, resulting in improved user experience and client satisfaction.
- Conducted daily end-to-end testing, documented bugs, and reported results to the team, contributing to 9+ defect-free production releases in a row.
- Collaborated with the back-end team to integrate Web API's to the front-end and handle the JSON response to ensure seamless communication between the two layers of the application.

Education

University of Portland
August 2015 — May 2019

Bachelor of Science in Computer Science

Skills

Programming Languages
JavaScript, TypeScript, HTML, CSS, Java

Frameworks/Libraries
React.js, Angular, Tailwind CSS, Bootstrap, Material UI, Ionic

Tools & Platforms
GitHub, Git, Figma, Visual Studio Code, Postman

Selected Projects

Navreen Kaur's Website
Personal website built with React.js and Tailwind CSS

Navi's Cookbook Designed and developed a full-stack, responsive web application using React.js, React Bootstrap, and Material UI. Implemented a back-end server with Node.js, Express.js to manage requests and responses between the application and MongoDB.
